

## 1. Identification

Product identifier	Lead Acid Battery Wet, Filled With Acid
Other means of identification	
Second identifier	U.S. Hazard Communication
Synonyms	May include gel/absorbed electrolyte type lead acid batteries
Recommended use	Electric storage battery.
Recommended restrictions	None known.
Manufacturer/Importer/Supplier/Distributor information	
Manufacturer/Supplier	East Penn Manufacturing Co.
Address	102 Deka Road, Lyon Station PA 19536
Telephone number	(610) 682-6361
Contact person	East Penn EHS Department
Emergency telephone number	USA/Canada: CHEMTREC (800) 424-9300, Outside USA 1 (703) 527-3887
E-mail	contactus@eastpenn-deka.com

## 2. Hazard(s) identification

Physical hazards	Explosives	Division 1.3
Health hazards	Skin corrosion/irritation	Category 1
	Serious eye damage/eye irritation	Category 1
	Carcinogenicity (Acid Mist)	Category 1A
	Carcinogenicity (Lead)	Category 1B
	Reproductive toxicity	Category 1A
	Reproductive toxicity	Effects on or via lactation
	Specific target organ toxicity, single exposure	Category 3 respiratory tract irritation
	Specific target organ toxicity, repeated exposure	Category 1 (Blood, Central Nervous System, Kidney, Lungs)

OSHA defined hazards Not classified.

### Label elements

Signal word Danger

Hazard statement The materials contained in this product may only represent a hazard if the integrity of the cell or battery is compromised; physically, thermally, or electrically abused. The below are the hazards anticipated under those conditions:

Explosive; fire, blast or projection hazard. Causes severe skin burns and eye damage. May cause cancer. May damage fertility or the unborn child. May cause harm to breast-fed children. May cause respiratory irritation. Causes damage to organs (Blood, Central Nervous System, Kidney, Lungs) through prolonged or repeated exposure.

### Precautionary statement

#### Prevention

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Keep only in original packaging. Do not breathe dust. Avoid contact during pregnancy/while nursing. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Wear protective gloves/protective clothing/eye protection/face protection.

<b>Response</b>	Explosion risk in case of fire. In case of fire: Evacuate area. Do NOT fight fire when fire reaches explosives. If swallowed: Rinse mouth. Do NOT induce vomiting. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. If inhaled: Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor.
<b>Storage</b>	Store in accordance with local/regional/national/international regulations. Store in a well-ventilated place. Keep container tightly closed.
<b>Disposal</b>	Refer to manufacturer/supplier for information on recovery/recycling. Dispose of contents/container in accordance with local/regional/national/international regulations.
<b>Hazard(s) not otherwise classified (HNOC)</b>	None known.
<b>Supplemental information</b>	In use, may form flammable/explosive vapor-air mixture.  Under normal conditions of processing and use, exposure to the chemical constituents in this product is unlikely. The battery should not be opened or burned. Exposure to the ingredients contained within or their combustion products could be harmful.

### 3. Composition/information on ingredients

#### Mixtures

Chemical name	CAS number	%
Lead and lead compounds (inorganic)	7439-92-1	43 - 70
Electrolyte (Sulfuric acid)	7664-93-9	20 - 44
Antimony	7440-36-0	3 - 5

<b>Composition comments</b>	All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume. Content composition concentrations will vary with battery type/size. The manufacturer has claimed the exact percentage as trade secret under the OSHA Hazard Communication Standard.
-----------------------------	--

### 4. First-aid measures

<b>Inhalation</b>	Exposure to contents of an open or damaged battery: Move injured person into fresh air and keep person under observation. Get medical attention if any discomfort continues.
<b>Skin contact</b>	Exposure to contents of an open or damaged battery: Immediately flush with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention if irritation develops and persists.
<b>Eye contact</b>	Exposure to contents of an open or damaged battery: Flush thoroughly with water for at least 15 minutes. Hold eyelids open during flushing. If irritation persists, repeat flushing. Get medical attention if irritation develops and persists.
<b>Ingestion</b>	Exposure to contents of an open or damaged battery: Rinse mouth thoroughly with water. DO NOT induce vomiting because of danger of aspirating liquid into lungs. Get medical attention immediately.
<b>Most important symptoms/effects, acute and delayed</b>	Under normal conditions of processing and use, exposure to the chemical constituents in this product is unlikely. The battery should not be opened or burned. Exposure to the ingredients contained within or their combustion products could be harmful. Heavy lead exposure may result in central nervous system damage, encephalopathy and damage to the blood-forming (hematopoietic) tissues.
<b>Indication of immediate medical attention and special treatment needed</b>	Treat symptomatically.
<b>General information</b>	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

### 5. Fire-fighting measures

<b>Suitable extinguishing media</b>	Dry chemical, foam, carbon dioxide, water fog.
<b>Unsuitable extinguishing media</b>	Do NOT use water on live electrical circuits.
<b>Specific hazards arising from the chemical</b>	Batteries evolve flammable hydrogen gas during charging and may increase fire risk. Containers may explode when heated.
<b>Special protective equipment and precautions for firefighters</b>	Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace.

<b>Fire fighting equipment/instructions</b>	In case of fire do not breathe fumes. Move container from fire area if it can be done without risk. DO NOT fight fire when fire reaches explosives.
<b>Specific methods</b>	Use standard firefighting procedures and consider the hazards of other involved materials.
<b>General fire hazards</b>	Like any sealed container, battery cells may rupture when exposed to excessive heat; this could result in the release of corrosive and flammable materials.

## 6. Accidental release measures

<b>Personal precautions, protective equipment and emergency procedures</b>	In the event of damage resulting in a leak of exposed materials, avoid contact with contents of an open or damaged cell or battery. Avoid contact with skin.
<b>Methods and materials for containment and cleaning up</b>	Neutralize the spilled material before disposal. Sweep up or vacuum up spillage and collect in suitable container for disposal. Dispose of waste and residues in accordance with local authority requirements.
<b>Environmental precautions</b>	Prevent runoff from entering drains, sewers, or streams.

## 7. Handling and storage

<b>Precautions for safe handling</b>	In the event of damage resulting in a leak of exposed materials, avoid contact with contents of an open or damaged cell or battery. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat, sparks and open flame. Do not allow conductive material to touch the battery terminals. A dangerous short circuit may occur and cause battery failure and fire. Pregnant or breastfeeding women must not handle this product. Wear appropriate personal protective equipment. Avoid release to the environment. Wash hands thoroughly after handling. Observe good industrial hygiene practices.
<b>Conditions for safe storage, including any incompatibilities</b>	Store in original tightly closed container. Protect containers from damage. Place cardboard between layers of stacked batteries to avoid damage and short circuits. Store away from incompatible materials (see Section 10 of the SDS).

## 8. Exposure controls/personal protection

### Occupational exposure limits

#### US. OSHA Specifically Regulated Substances (29 CFR 1910.1001-1053)

Components	Type	Value
Lead and lead compounds (inorganic) (CAS 7439-92-1)	TWA	0.05 mg/m3

#### US. OSHA Table Z-1 Permissible Exposure Limits (PEL) for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value
Antimony (CAS 7440-36-0)	PEL	0.5 mg/m3
Electrolyte (Sulfuric acid) (CAS 7664-93-9)	PEL	1 mg/m3

#### US. ACGIH Threshold Limit Values (TLV)

Components	Type	Value	Form
Antimony (CAS 7440-36-0)	TWA	0.5 mg/m3	
Electrolyte (Sulfuric acid) (CAS 7664-93-9)	TWA	0.2 mg/m3	Thoracic fraction.
Lead and lead compounds (inorganic) (CAS 7439-92-1)	TWA	0.05 mg/m3	

#### NIOSH. Immediately Dangerous to Life or Health (IDLH) Values, as amended

Components	Type	Value
Electrolyte (Sulfuric acid) (CAS 7664-93-9)	IDLH	15 mg/m3
Lead and lead compounds (inorganic) (CAS 7439-92-1)	IDLH	100 mg/m3

#### US. NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value
Antimony (CAS 7440-36-0)	TWA	0.5 mg/m3

**US. NIOSH: Pocket Guide to Chemical Hazards**

Components	Type	Value
Electrolyte (Sulfuric acid) (CAS 7664-93-9)	TWA	1 mg/m3
Lead and lead compounds (inorganic) (CAS 7439-92-1)	TWA	0.05 mg/m3

**Biological limit values** No biological exposure limits noted for the ingredient(s).

**ACGIH Biological Exposure Indices (BEI)**

Components	Value	Determinant	Specimen	Sampling Time
Lead and lead compounds (inorganic) (CAS 7439-92-1)	200 µg/l	Lead	Blood	*

\* - For sampling details, please see the source document.

**Appropriate engineering controls** Provide adequate ventilation. Eye wash facilities and emergency shower must be available when handling this product.

**Individual protection measures, such as personal protective equipment**

**Eye/face protection** None under normal conditions. Leak from a damaged or opened battery: Wear safety glasses with side shields (or goggles) and a face shield.

**Skin protection**

**Hand protection** None under normal conditions. Leak from a damaged or opened battery: Wear appropriate chemical resistant gloves. Glove material: Nitrile rubber Layer thickness: 0.152 or 0.381 mm Breakthrough time: 240 or 480 min. Suitable gloves can be recommended by the glove supplier.

**Skin protection**

**Other** None under normal conditions. Leak from a damaged or opened battery: Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

**Respiratory protection** None under normal conditions. In the event that cell or battery is damaged, open, or leaking, respiratory protection should be worn where there is a potential to exceed the exposure limit requirements or guidelines.

**Thermal hazards** When material is heated, wear gloves to protect against thermal burns.

**General hygiene considerations** Observe any medical surveillance requirements. Do not eat, drink or smoke when using the product. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

**9. Physical and chemical properties****Appearance**

**Physical state** Solid.  
**Form** Sulfuric acid, liquid. Lead, solid.  
**Color** Various.

**Odor** Odorless.

**Odor threshold** Not applicable (material is odorless).

**pH** < 1

**Melting point/freezing point** Property has not been measured.

**Initial boiling point and boiling range** > 235 - < 240 °F (> 112.78 - < 115.56 °C) (Sulfuric acid)

**Flash point** Below room temperature (as hydrogen gas).

**Evaporation rate** < 1 (n-BuAc=1)

**Flammability (solid, gas)** Like any sealed container, battery cells may rupture when exposed to excessive heat; this could result in the release of corrosive and flammable materials.

**Upper/lower flammability or explosive limits**

**Explosive limit - lower (%)** 4 % (Hydrogen)

**Explosive limit - upper (%)** 74 % (Hydrogen)

**Vapor pressure** 10 mm Hg

**Vapor density** > 1 (Air=1)

<b>Relative density</b>	> 1.27 - < 1.33
<b>Solubility(ies)</b>	
<b>Solubility (water)</b>	100 % (Sulfuric acid)
<b>Partition coefficient (n-octanol/water)</b>	Not applicable, product is a mixture.
<b>Auto-ignition temperature</b>	Not relevant as the product is solid.
<b>Decomposition temperature</b>	Not applicable as the product is not unstable.
<b>Viscosity</b>	Not applicable, material is a solid.
<b>Other information</b>	
<b>Explosive properties</b>	Explosive.
<b>Flammability</b>	Like any sealed container, battery cells may rupture when exposed to excessive heat; this could result in the release of corrosive and flammable materials.
<b>Kinematic viscosity</b>	Not applicable, material is a solid.
<b>Oxidizing properties</b>	Not oxidizing.

## 10. Stability and reactivity

<b>Reactivity</b>	Reacts violently with strong alkaline substances. This product may react with reducing agents. Not reactive under prescribed storage conditions.
<b>Chemical stability</b>	Stable at normal conditions.
<b>Possibility of hazardous reactions</b>	Will not occur.
<b>Conditions to avoid</b>	Overcharging. Ignition sources. Contact with incompatible materials. Do not mix with other chemicals.
<b>Incompatible materials</b>	Water. Strong bases. Reducing agents. Combustible organic materials. Finely divided metals. Strong oxidizers.
<b>Hazardous decomposition products</b>	Sulfur dioxide. Sulfur trioxide. Carbon monoxide. Sulfuric acid. Hydrogen.

## 11. Toxicological information

### Information on likely routes of exposure

<b>Inhalation</b>	Dust may irritate respiratory system. Exposure to contents of an open or damaged battery: Difficulty in breathing. Frequent inhalation of dust over a long period of time increases the risk of developing lung diseases.
<b>Skin contact</b>	Exposure to contents of an open or damaged battery: Causes skin burns.
<b>Eye contact</b>	Exposure to contents of an open or damaged battery: Causes severe eye burns.
<b>Ingestion</b>	Exposure to contents of an open or damaged battery: May be harmful if swallowed. May cause digestive tract burns.
<b>Symptoms related to the physical, chemical and toxicological characteristics</b>	Under normal conditions of processing and use, exposure to the chemical constituents in this product is unlikely. The battery should not be opened or burned. Exposure to the ingredients contained within or their combustion products could be harmful. Heavy lead exposure may result in central nervous system damage, encephalopathy and damage to the blood-forming (hematopoietic) tissues.

### Information on toxicological effects

<b>Acute toxicity</b>	Exposure to contents of an open or damaged battery: May be harmful if swallowed.
-----------------------	--

Components	Species	Test Results
Electrolyte (Sulfuric acid) (CAS 7664-93-9)		
<b>Acute</b>		
<b>Oral</b>		
LD50	Rat	2140 mg/kg
<b>Skin corrosion/irritation</b>	Exposure to contents of an open or damaged battery: Causes severe skin burns.	
<b>Serious eye damage/eye irritation</b>	Exposure to contents of an open or damaged battery: Causes serious eye damage.	
<b>Respiratory or skin sensitization</b>	Not classified as a sensitizer.	
<b>Respiratory sensitization</b>	No data available.	

<b>Skin sensitization</b>	No data available.
<b>Germ cell mutagenicity</b>	No data available.
<b>Carcinogenicity</b>	The International Agency for Research on Cancer (IARC) has classified "strong inorganic acid mists containing sulfuric acid" as a known human carcinogen, (IARC category 1). This classification applies only to mists containing sulfuric acid and not to sulfuric acid or sulfuric acid solutions.

#### IARC Monographs. Overall Evaluation of Carcinogenicity

Electrolyte (Sulfuric acid) (CAS 7664-93-9)	1 Carcinogenic to humans.
Lead and lead compounds (inorganic) (CAS 7439-92-1)	2B Possibly carcinogenic to humans.

#### NTP Report on Carcinogens

Electrolyte (Sulfuric acid) (CAS 7664-93-9)	Known To Be Human Carcinogen.
Lead and lead compounds (inorganic) (CAS 7439-92-1)	Reasonably Anticipated to be a Human Carcinogen.

#### OSHA Specifically Regulated Substances (29 CFR 1910.1001-1053)

Not listed.

<b>Reproductive toxicity</b>	None under normal conditions. Exposure to contents of an open or damaged battery: May cause harm to breastfed babies. May damage fertility or the unborn child.
<b>Specific target organ toxicity - single exposure</b>	None under normal conditions. Exposure to contents of an open or damaged battery: May cause respiratory irritation.
<b>Specific target organ toxicity - repeated exposure</b>	None under normal conditions. Exposure to contents of an open or damaged battery: May cause damage to organs (Central nervous system, blood, kidney, lungs) through prolonged or repeated exposure.
<b>Aspiration hazard</b>	Due to the physical form of the product it is not an aspiration hazard.
<b>Chronic effects</b>	Exposure to contents of an open or damaged battery: Heavy lead exposure may result in central nervous system damage, encephalopathy and damage to the blood-forming (hematopoietic) tissues. Chronic inhalation of sulfuric acid mist may increase the risk of lung cancer.

## 12. Ecological information

<b>Ecotoxicity</b>	None under normal conditions. Exposure to contents of an open or damaged battery: Very toxic to aquatic life with long lasting effects.
--------------------	---

Components	Species	Test Results
Lead and lead compounds (inorganic) (CAS 7439-92-1)		
LC50	Rainbow trout, donaldson trout (Oncorhynchus mykiss)	1.17 mg/l, 96 Hours

<b>Persistence and degradability</b>	The degradation half-life of the product is not known. Lead and its compounds are highly persistent in water.
--------------------------------------	---

<b>Bioaccumulative potential</b>	Bioaccumulation of lead occurs in aquatic and terrestrial animals and plants, but very little bioaccumulation occurs through the food chain.
----------------------------------	--

#### Partition coefficient n-octanol / water (log Kow)

Electrolyte (Sulfuric acid) (CAS 7664-93-9)	-2.2
---	------

<b>Mobility in soil</b>	If the product enters soil, one or more constituents will or may be mobile and may contaminate groundwater.
-------------------------	---

<b>Mobility in general</b>	The product is insoluble in water and will sediment in water systems.
----------------------------	---

<b>Other adverse effects</b>	None known.
------------------------------	-------------

## 13. Disposal considerations

<b>Disposal instructions</b>	Recycle the batteries as the primary disposal method. Neutralize electrolyte/sulfuric acid. Avoid discharge into water courses or onto the ground. Do not contaminate ponds, waterways or ditches with chemical or used container.
------------------------------	--

<b>Local disposal regulations</b>	Empty containers should be taken to an approved waste handling site for recycling or disposal.
-----------------------------------	--

<b>Hazardous waste code</b>	RCRA: Spent lead-acid batteries are not regulated as hazardous waste when recycled. Depending upon circumstances, the following waste codes may apply: Spilled electrolyte/Sulfuric acid. D002: Corrosive waste D004: Waste Arsenic D008: Lead The waste code should be assigned in discussion between the user, the producer of the waste, and the waste disposal company.
-----------------------------	--

<b>Waste from residues / unused products</b>	Avoid discharge into water courses or onto the ground.
--	--

**Contaminated packaging** Since emptied containers retain product residue, follow label warnings even after container is emptied.

## 14. Transport information

### DOT

UN number	UN2794
UN proper shipping name	Batteries, wet, filled with acid, electric storage
Transport hazard class(es)	
Class	8
Subsidiary risk	-
Label(s)	8
Packing group	-
Environmental hazards	
Marine pollutant	Yes
Special precautions for user	Read safety instructions, SDS and emergency procedures before handling.
Packaging exceptions	159
Packaging non bulk	159
Packaging bulk	159

### IATA

UN number	UN2794
UN proper shipping name	Batteries, wet, filled with acid electric storage
Transport hazard class(es)	
Class	8
Subsidiary risk	-
Packing group	-
Environmental hazards	Yes
ERG Code	8L
Special precautions for user	Read safety instructions, SDS and emergency procedures before handling. Packing Instruction: 870

### IMDG

UN number	UN2794
UN proper shipping name	BATTERIES, WET, FILLED WITH ACID electric storage
Transport hazard class(es)	
Class	8
Subsidiary risk	-
Packing group	-
Environmental hazards	
Marine pollutant	Yes
EmS	F-A, S-B
Special precautions for user	Read safety instructions, SDS and emergency procedures before handling. Packing Instruction: P801

**Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code** Not applicable.

## 15. Regulatory information

**US federal regulations** This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Hazardous Chemical Reporting Requirements apply when an Extremely Hazardous Substance is present at a facility in an amount equal to or exceeding 500 pounds or the Threshold Planning Quantity, whichever is lower per 40CFR370.10(a)(1)

### TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Lead and lead compounds (inorganic) (CAS 7439-92-1)	0.1 % Annual Export Notification required.
---	--

### CERCLA Hazardous Substance List (40 CFR 302.4)

Antimony (CAS 7440-36-0)	Listed.
Electrolyte (Sulfuric acid) (CAS 7664-93-9)	Listed.
Lead and lead compounds (inorganic) (CAS 7439-92-1)	Listed.

### SARA 304 Emergency release notification
