# 4. FIRST AID MEASURES

#### First aid measures for different exposure routes

**General advice** Show this safety data sheet to the doctor in attendance.

**Eye contact** Immediately flush thoroughly with cool water under low pressure for at least 15 minutes,

holding lids apart and moving eye to ensure flushing of the entire surface. Call a physician.

**Skin contact** Immediately flush with plenty of cool water for at least 15 minutes, while removing

contaminated clothing and shoes. Call a physician immediately.

**Inhalation** Remove to fresh air. If breathing has stopped, apply suitable artificial respiration. Get

medical help.

Ingestion Never give anything by mouth to an unconscious person. DO NOT INDUCE VOMITING. If

conscious give large quantities of water. If vomiting occurs spontaneously, keep airway

clear. Seek medical attention.

**Protection of First-aiders**Do not use mouth-to-mouth method if victim ingested or inhaled the substance; induce

artificial respiration with the aid of a pocket mask equipped with a one-way valve or other

proper respiratory medical device.

#### Most important symptoms/effects, acute and delayed

Main Symptoms The most important known symptoms and effects are described in the labelling in section 2

and/or in section 11.

#### Indication of immediate medical attention and special treatment needed, if necessary

**Notes to physician** Probable mucosal damage may contraindicate the use of gastric lavage.

## 5. FIRE-FIGHTING MEASURES

#### **Suitable Extinguishing Media**

Water. Dry chemical. Carbon dioxide (CO<sub>2</sub>).

Unsuitable Extinguishing Media CAUTION: Use of water spray when fighting fire may be inefficient.

## Specific hazards arising from the chemical

High Temperatures will release chlorine gas. Oxidizing agent. Contact with flammable liquids or vapors may cause immediate fire or explosion, especially if heated, or it may result in delayed explosion. Decomposition will release oxygen, which will increase the explosive limits and burning rate of flammable vapors.

# Explosion Data

Sensitivity to Mechanical Impact None. Sensitivity to Static Discharge None.

# **Protective Equipment and Precautions for Firefighters**

Wear self-contained breathing apparatus with a full facepiece and protective clothing. Use water spray to cool nearby containers and structures exposed to fire.

# 6. ACCIDENTAL RELEASE MEASURES

#### Personal precautions, protective equipment and emergency procedures

**Personal precautions** Ensure adequate ventilation. Avoid contact with skin, eyes and clothing. Use personal

protective equipment. Do not eat, drink or smoke when using this product. Wash face,

hands and any exposed skin thoroughly after handling.

Environmental precautions

Environmental precautions Neutralization is normally necessary before waste water is discharged into water treatment

plants. See Section 12 for additional Ecological Information.

#### Methods and materials for containment and cleaning up

**Methods for Containment** Prevent further leakage or spillage if safe to do so.

Methods for cleaning up Flush small amounts to drain after neutralization with sodium bisulfate or thiosulfate. Collect

and return large amounts to an appropriate container. Leaks should be stopped and spills contained. Neutralize residue with sodium thiosulfate for chlorine and dilute mineral acids

for alkalinity.

# 7. HANDLING AND STORAGE

## Precautions for safe handling

Advice on safe handling Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or

using toilet facilities. Wash thoroughly after work using soap and water. Do not eat, drink or

smoke when using this product.

#### Conditions for safe storage, including any incompatibilities

Technical measures/Storage conditions

Keep container in cool well ventilated area. Store away from incompatible materials. Keep

out of the reach of children.

Incompatible products Concentrated mineral acids, heat, soft metals or nitrogen containing chemicals like

ammonia.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### Control parameters

**Exposure Guidelines** Review Section 3 & 4 for Exposure Guidelines.

# Appropriate engineering controls

Engineering Measures Ensure adequate ventilation and that running water is available for washing eyes and skin Individual protection measures, such as personal protective equipment

**Eye/Face Protection** Splash-proof chemical goggles or face shield.

**Skin and body protection** Wear appropriate chemical resistant clothing and chemical resistant gloves.

Respiratory protection If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved

respiratory protection should be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be

provided in accordance with current local regulations.

**Hygiene measures** Remove and wash contaminated clothing before re-use.
